Summary

I am a result-driven .NET and PHP developer with over 5.5 years of experience in both software and web development. I can perform software architecting and implementation from the front-end to the back-end, even though I am more experienced in front end web development. I have in-depth knowledge of software development life-cycle.

I have good team management experience, good communication and interpersonal skills. I am self-motivated, keen to learn and enjoy challenges. I can be a team player and also work independently.

I am naturally inquisitive and stay up to date with new technologies. Programming is not just my job, it is my passion.

Technical skills

Languages

C#.NET, PHP 5.

Web Technologies

HTML5, CSS3, JavaScript, jQuery, AJAX, Knockout, XML, XHTML, JSON, RSS, WordPress, Joomla, Bitrix.

Technologies and frameworks

ASP.NET, MVC (Razor), C#.Net, .Net Membership, Zend Framework (v1, v2), XSLT, Win Forms, Log4NET, NLog, Reporting Service, LINQ, Google Map API, REST API.

Data Access Technologies

LINQ, Linq2SQL, LINQ To XML, ADO.NET Entity Framework, Zend Framework, SQL, MySQL/MSSQL, PostgreSQL.

Development Environment

Visual Studio 2008/2010/2012, SQL Server 2008, Zend Studio 9, tortoiseGit, tortoiseSVN, JIRA, Team Foundation Server (TFS).

Experience

August 2014 – November 2014 (4 months)

• Local Experience

Web Developer

at [INCSub](http://incsub.com/)

<http://incsub.com/>

Incsub is a Melbourne based international team of developers and designers. The team is behind such Wordpress projects as [WPMU DEV](#) and [Ebublogs](#). As part of this team I had the following duties and responsibilities:

Duties and responsibilities:

- Building several wordpress themes from scratch based on provided designs (CSS3, HTML5, jQuery)
- Testing a wordpress-based internal tool
- Providing detailed bug reports to the team
- Supporting existing websites by fixing bugs (User interface issues)
- Basic troubleshooting and debugging. Tools and methods used: javascript console, session tracing, php breakpoints debugging

Achievements:

- Several wordpress themes have been built
- Reported over 100 existing bugs in 3 months. Consequently, the company products quality has been improved significantly

April 2009 – July 2014 (5 years 4 months)

Software Developer

at [EDISON Software Development Centre](http://www.edsd.com/about)

<http://www.edsd.com/about>

EDISON is a dynamic and developing outsourcing company based in Russia that brings together professional software designers and engineers. Today, EDISON develop software for large companies in the US, Russia, Australia and Europe, and also has several projects of its own. As a Software Developer at this company, I was involved in a vast range of projects. Major projects are listed below:

Project 1: “Electronic ticket” (Duration 1 year 2 months)

Online ticketing system which makes it possible to book e-tickets for regional bus-routes.

Duties and responsibilities:

- Discussing business requirements with a client
- Analysing requirements and designing required algorithms and solutions for developing applications
- Implementing the part of the system for the client: website with ASP.NET MVC (razor), Entity Framework 4.0 and LINQ, WCF.
- Preparing functional documentation

Achievements:

- A successful project delivery from concept to cash
- A growth in the company by progress in positions

Project 2: A feedback system for retail networks (Duration 1 year)

This system provides business owners with a fast and efficient method of getting feedback from sales points for business owners.

Duties and responsibilities:

- Research and development to make sure we were using the most appropriate and up-to-date methods and solutions
- Migrating from a Zend Framework v1 to a Zend framework v2
- Designing and developing infrastructure of the front-end application
- Developing the UI layer with JQuery , CSS 3, HTML 5
- Globalisation and localisation
- Basic troubleshooting

Achievements:

- New framework (Zend Framework) was learnt
- Improved my jQuery and CSS skills

Project 3: Sales system (Duration 6 months)

The internal system which allows our company to get the latest projects from leading freelance networks.

Duties and responsibilities:

- Leading a team of 3 programmers.
- Creating the main structure of the database.
- Developing a web-based application using ASP.NET MVC (razor)
- Developing a windows service applications which gathers projects using a time scheduler Quartz.
- Installation, configuration, performance tuning, optimisation, backup and recovery in SQL Server 2008.

Achievements:

- After the system was deployed, sales rates increased by approximately 20%.
- Obtained experience as the leader of the team.

Project 4: AlfaPrint (Duration 5 months)

The client-oriented company's presentation website designed in the proper corporate style. [www.alfaprint.pro]

Duties and responsibilities:

- Analysing project requirements and suggesting solutions
- Sole designing and developing the entire website from scratch using CMS Wordpress, CSS, jQuery, Javascript, HTML

Achievements:

- Decreased the cost and time of the project by finding the best and fastest way to implement required functionality.

I have also been involved in several small projects which include the following duties and responsibilities:

Duties and responsibilities:

- Specifying and developing a robust RESTful API based on open-source industry standards
- Reviewing codes written by team members
- Working in full life-cycle of development, including analysis, design, development, deployment, testing, documentation, implementation, and maintenance of applications

Education

September 2005 - June 2010

[Kemerovo State University](#)

Higher Education in software engineering and management of information systems (**Equivalent to an AQF Bachelor Degree with a major in computing**)

✓ 4.8/5.0 GPA in Computer Science subjects

Hobbies and interests

Modern automotive industry, computer programming, travelling, playing guitar.
